ABB AB et al						
1. This report is the international preliminary examination report, established by this International Preliminary Examining						
· · · · · · · · · · · · · · · · · · ·	ansmitted to the applicant according to Article					
2. This REPORT consists of a total		er sheet.				
3. This report is also accompanied b	y ANNEXES, comprising:					
a. (sent to the applicant	t and to the International Bureau) a total of	sheets, as follows:				
sheets of the	description, claims and/or drawings which ha	we been amended and are the basis of this report				
	containing rectifications authorized by this A ve Instructions).	uthority (see Rule 70.16 and Section 607 of the				
sheets which	supersede earlier sheets, but which this Author	ority considers contain an amendment that goes				
beyond the d Supplementa		ed, as indicated in item 4 of Box No. I and the				
b (sent to the Internation	onal Bureau only) a total of (indicate type and					
form only as indicat	, containing a sequence listing to the Supplemental Box Relating to Sequence	g and/or tables related thereto, in electronic ance Listing (see Section 802 of the				
Administrative Instru						
4. This report contains indications r	elating to the following items:					
Box No. I Basis of	of the report					
Box No. II Priorit	y					
Box No. III Non-es	stablishment of opinion with regard to novelty	, inventive step and industrial applicability				
Box No. IV Lack o	of unity of invention					
Box No. V Reason	ned statement under Article 35(2) with regard	to novelty, inventive step or industrial				
	applicability; citations and explanations supporting such statement					
	n defects in the international application					
	ain observations on the international application

International application No.

PCT/SE2005/000176

Box No. V Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

1. Statement

Novelty (N)	Claims Claims	1-25	YES NO
Inventive step (IS)	Claims Claims	7-20 1-6. 21-25	YES NO
Industrial applicability (IA)	Claims Claims	1-25	YES NO

2. Citations and explanations (Rule 70.7)

Reference is made to the following document: D1: US 6356807 B1

The invention concerns a method for controlling an industrial robot and solves the problem of correcting distance errors between programmed positions and corresponding actual positions.

Document D1 is considered to represent the closest prior art. D1 describes an industrial robot, e.g. for spot welding, and a method for determining a contact point between a tool tip and a surface of a work piece. The tool tip is placed at a programmed position at a distance from the surface and is moved towards the surface. A collision point is detected and positioned when the motor torque has increased to a predetermined value (see column 3, lines 4-21 and column 5, line 49- column 8, line 5).

The invention according to independent claims 1, 6 and 21-23 differs from the method in D1 in that the position of the contact point is calculated by adding to the programmed position the distance the tool tip is moved to the contact point. Due to these features an exact determination of the contact point between the tool tip and the work piece is achieved.

Consequently, with the background of D1, the problem is to design an alternative method for calculating the position of the contact point between the tool tip and the work piece.

PCT/SE2005/000176

Supplemental Box

In case the space in any of the preceding boxes is not sufficient. Continuation of: Box V

The person skilled in the art searches for alternative solutions of the above mentioned problem of calculating a position. It is therefore considered obvious to modify the closest prior art and thus arrive at the invention according to claims 1, 6 and 21-23 especially as no unexpected effect is obtained. Accordingly, the invention claimed in claims 1, 6 and 21-23 does not fulfil the requirement of inventive step.

Dependent claims 2-5, 24 and 25 merely involve details which are known from D1 or come within the scope of the customary practice followed by persons skilled in the art. Consequently, the subject-matter of claims 2-5, 24 and 25 also lacks an inventive step.

To sum up, the invention according to claims 1-25 is novel (N) but the invention according to claims 1-6, 21-25 lacks an inventive step (IS). All claims have industrial applicability (IA).
